HOME & Design

Olah!

Designer Daniel Olah creates exquisite classic English-inspired homes with modern twists, accents and elements.

Today's homeowners desire the best of both worlds, enhancing the traditional architecture while incorporating new upscale components. Soaring ceilings, spacious bathrooms, open concept kitchens with islands, and other luxurious appointments – from authentic stone fireplaces to stunning surfaces throughout – give Olah's dream homes the ultimate flow for today's lifestyles. Exterior elements, including outdoor kitchens, fire pits and gorgeous hardscapes, are also highly coveted "new-age" inclusions. Can you accomplish all of these modern bells and whistles while maintaining centuries-old architectural integrity? "Absolutely," says Olah, and the proof is in the pictures. Working closely with homeowners and an incredible team of collaborating design specialists, Olah creates each home with brushstrokes of details with the goal of a seamless environment coming to life.

This may be our favorite kitchen ever with its bold and eclectic design that combines three contrasting wood elements. Crisp white walls contrast the dark cherry cabinetry with Carpathian elm inlays. The rustic ceiling of reclaimed barnwood adds texture and interest. A cream herringbone backsplash adorns the seven-burner range. The gorgeous space is finished with luxurious quartz countertops with a double ogee edge.

DANIEL OLAH, AIBD

Olah Design Group began as a passion in the heart of a creative young professional. Now, with almost 30 years of experience, Dan Olah is principal designer of his own residential design firm in Marietta.

A double-sided fireplace is crowned with a stunning hand-carved limestone mantle.

A large outdoor dining area with a brick wall, arched openings, and a wooden ceiling. The space is furnished with a round glass table and four chairs with green and white striped cushions. A large potted plant sits on a blue stand to the right. The floor is made of red brick.

“The variety of materials used work so well together because of the planning that went into the scale of rooms and structure.”

Mahogany doors with pre-cast limestone casings are symmetrically placed across from the gentle arches opening to the back lawn allowing for maximum natural light and beauty. Dining alfresco under the cedar porch ceiling is the perfect setting for all seasons.

An outdoor kitchen with a stainless steel grill, range hood, and brick walls. The floor is made of large, irregular bluestone tiles. The walls are made of red brick with a white V-groove ceiling. The space is open to a lush green lawn.

Beautiful bluestone floors contrast the white V-groove ceiling, adding dimension and texture against a wall of weathered brick in the outdoor kitchen.

KITCHEN AND INTERIOR DESIGNER:
MELINDA HEIDT OF M DIMENSION

This kitchen has so many things to love, from the gray crackle-glazed lantern tile backsplash to the contrasting white and gray kitchen cabinetry crowned by gorgeous marble countertops. Dark cedar beams visually separate the kitchen from the living room while maintaining an open flow.

THE BUTLER'S PANTRY

“A place for
everything
and
everything
in its place.”

This functional pantry sets the stage for beautiful party prep with dark quartz countertops, glossy glass backsplash, plentiful wine storage and diamond glass-paneled cabinets complete with inset lights.

The central focus of the living room is the fireplace with a limestone mantle flanked by recessed custom painted built-ins. The diamond glass cabinet doors bring sophistication and modern elegance to this artfully appointed space.

Spa-like Serenity

This luxurious guest bath features a frameless glass shower enclosure with a mosaic pebblestone floor. The floor-to-soaring-ceiling faux marble porcelain tile makes this suite designed to dazzle. The round deco mirror evokes Hollywood glamour.

Conversations spill outside in this art-inspired living room overlooking the back lawn. A peek inside showcases the elegance of this home.

Warm up on chilly nights next to this solid limestone fireplace in the master suite sitting room. Custom recessed bookshelves hold treasured collections while the tongue-and-groove ceiling adds architectural interest above.
